

LAILIN NUR ASIYAH

SOFTWARE DEVELOPER & IT SUPPORT

PERSONAL PROFILE

I am a Junior Software Developer and IT Support with over 4 years of experience in designing, developing, testing, and integrating information systems based on PHP, Java, and JavaScript (Node.js, Vue.js, Nuxt.js), as well as managing Linux servers and SQL databases (PostgreSQL, MySQL). I am used to working with Windows/Linux operating systems, understand software architecture, and have experience in developing integrated systems such as SIMRS and BPJS service bridging. I have strong analytical skills, attention to detail, and the ability to work independently or collaboratively in a team, with a focus on quality and efficiency.

SKILLS

- Adaptability
- Excellent Communication Skills
- JavaScript, HTML5, CSS, PHP, MySQL, PostgreSQL, Java, Nuxt JS, Vue JS
- Git Version Control
- Outstanding software testing using postman
- Strong collaboration skills
- Teamwork
- Linux Server
- Apache, Payara
- Trouble shooting hardware dan software
- IT Support, Ms Office

PERSONAL INFO

- Address : Jalan anggrek No. 1A , RT 4 RW 3 , Kelurahan Ketabang, Kecamatan Genteng, Surabaya.
- Phone : 085257416373
- E-mail: lailinnurasiyah@gmail.com
- LinkedIn: <https://www.linkedin.com/in/lailin-nur-asiyah/>

WORK EXPERIENCE

IT STAFF

RSUM Bandung - Tulungagung | October 2020 - June 2025

- Designed, developed, and tested the Hospital Management Information System (HMIS/SIMRS) using Java and PostgreSQL.
- Built attendance and logbook applications using HTML5, JavaScript, PHP, and MySQL to improve operational efficiency and reduce hospital operating costs by 5%, replacing the previous paper-based system.
- Prepared technical documentation for end-users.
- Involved in BPJS integration (VClaim, Icare, Antrol) and Electronic Medical Records (ERM) development using REST API.
- Managed SIMRS development using Git-based version control in collaboration with vendors.
- Configured Linux-based servers to ensure smooth system operations.
- Handled troubleshooting for software, hardware, and computer networks.
- Provided IT support, including resolving user issues when accessing the system (e.g., login errors, missing data, or input/output errors), and troubleshooting hardware such as printers, CPUs, and computer networks.

SOFTWARE ENGINEER

PT Hash Rekayasa Teknologi | June - July 2020

- Updated and developed back-end logic using JavaScript for internal systems and client requirements.
- Handled bug fixing and new feature development collaboratively using GitLab as version control and team coordination platform.
- Collaborated cross-functionally with QA teams, front-end developers, and business analysts to ensure solutions met requirements.
- Contributed to code reviews, technical documentation, and optimization of application performance and scalability

FREELANCE SOFTWARE DEVELOPER

BALITKABI Malang | December 2019 - July 2020

- Responsible for back-end development using the PHP Slim Framework for the "KABI" application, an information system containing data on sellers and breeders of legume and tuber commodities in the Java region.
- Conducted API testing using Postman to ensure API stability and performance in supporting front-end services.
- Prepared user documentation to help end-users understand the application flow and available feature functions.
- Collaborated with the team to ensure the system met institutional needs with an efficient and maintainable structure

LAB PRACTICUM ASSISTANT

Universitas Kanjuruhan Malang | Nov 2018 - Des 2019

- Monitored student readiness at the beginning of practicums
- Guided students according to practicum schedules in Java (NetBeans), PHP, Java (Android Studio), Statistics (SPSS), and Database Structure (MySQL)

EDUCATION & AWARDS

UNIVERSITAS KANJURUHAN MALANG

S.Kom, | September 2016 - Mei 2020

- Bachelor of Computer Science with a GPA of 3.76. Graduated as the best graduate in the Informatics Engineering program in 3.5 years.
- Published a journal in SINTA 4 (JOINTECS Vol. 5 No. 2): Implementation of Restful Web Service to Optimize Access Speed on Android-based Applications (JOINTECS Volume 5, No 2 <https://doi.org/10.31328/jointecs.v5i2.1260>).
- 3rd Place Winner in ICT Innovation held by BARENLITBANG Malang with innovation: "TANEE" - Agricultural Service Application to Support Agriculture Information Using Mobile Technology in Supporting Digital Malang.
- Member of Informatics Engineering Student Association (HMPSTI)
- B.Sc. (S.Kom)

LICENCES

- Oracle Database WDP Program (2015).
- English Proficiency Test Score: 640 (2020).
- KEMNAKER Certification in Interactive Web Design and Game Development using JQuery (30 Hours) (2020).
- Dicoding Course: DevOps Fundamentals (Des 2025).
- Dicoding Course: Web Programming Basics (Exp. Mar 24, 2023)
- Dicoding Course: AWS Cloud Practitioner Essentials (Exp. Dec 23, 2024)
- Dicoding Course: Generative AI Fundamentals (2025)
